

Burgdorf May 21, 2010

Dear drivers,

please be aware that the official race direction on the permanent MAC Burgdorf track is clockwise. As a World Championship track has to be new by at least 60%, a part of the track is closed and driving against the official race direction is prohibited! The World Championships will be run counter-clockwise.

To ensure that no driver tries to gain training advantage, a camera system monitoring the track is installed. So if someone drives against the official race direction we will identify the person and the result may be a disqualification for the World Championships.

By acting this way, we want to ensure an exciting and fair competition.

Hope to see you all at the World Championships in Burgdorf!

Best regards,

*Josef Dragani*

*Electric Track Chairman DMC e.V.*
